

## **Volunteer Opportunity with E2D (Eliminate the Digital Divide)**

E2D is a Charlotte-based nonprofit dedicated to ensuring everyone has the technology they need to succeed. We expand economic opportunity by training young adults, transforming donated technology, and equipping North Carolina communities with essential digital tools to thrive.

We're excited to invite your team to join us for a hands-on volunteer event at the E2D lab in Charlotte. Volunteers will help with important tasks like cleaning, sorting, and organizing laptops and other equipment. By doing this prep work, you'll free up valuable time for our student lab techs to focus on refurbishing and repairs. No technical experience is required - our staff will provide full training and guidance.

For those with technical experience, we can also arrange unique experiences to assist with laptop repairs and other refurbishment tasks.

Our volunteer events are designed for up to 20 volunteers and typically last 2 hours but we can be flexible with timing. Casual dress and comfortable shoes are recommended. It's a great opportunity to make a tangible difference in closing the digital divide while building teamwork and community impact. We can't wait to see you!
