THE CURRENT IP SYSTEM IS A PAIN

THE CURRENT IP SYSTEM

WHAT IS IDEABLOCK?

IdeaBlock leverages blockchain to fortify your assets instantly. Forever.

IdeaBlock protects your IP and your IP and your bottom line.

IdeaBlock insures against future legal challenges.

HOW IDEABLOCK SECURES YOUR IP

1 SEND

User logs in and uploads a new idea description via one or more files.

2 SECURE

Let us do the heavy lifting. We receive your uploaded idea and tether it to five separate blockchains, where it will be available forever.

3 SAFE

IdeaBlock creates provable prior art that shields your idea against any future legal challenges. Want to keep it a trade secret? We've got you covered there, as well.

SOME IDEABLOCK FEATURES

- 1 SEAMLESS ENTERPRISE INTEGRATION**
Our enterprise version will ship with role creation, allowing internal idea submission to mimic existing IP submission to legal departments
- 2 AUTOMATED UPLOADS VIA DAEMON**
Simply associate any file with an idea or idea family and IdeaBlock will watch for file edits and upload updates at any frequency you choose.
- 3 RUN YOUR OWN IDEABLOCK INSTANCE**
Clients can join IdeaBlock's decentralized database network and submit ideas directly to local node.
- 4 UPDATE PREVIOUS IDEAS INSTANTLY**
Update past ideas early and often instead of the additional delays, costs, and legal exposure that comes with updating traditional IP.
- 5 ROLE CREATION AND MANAGEMENT**
Organizations can create and maintain user roles and permissions to submit and approve ideas from inventors.
- 6 NOT LIMITED TO ANY TYPE OF IDEA OR IP**
IdeaBlock can protect ideas that are to be held as trade secrets, works of art, music, software, or any other works of authorship.
- 7 SECURE WEBSOCKET COMMUNICATION**
Chat, share ideas, or submit IP to your in-house legal department for upload and/or patent submission approval via the IdeaBlock interface
- 8 IDEABLOCK PLAYS WELL WITH OTHER IP**
IdeaBlock serves as a powerful compliment to traditional forms of IP, providing defensive IP protection to the offensive protection provided by, for instance, patents and copyrights.
- 9 PROTECT THEN SURRENDER**
IdeaBlock allows those who wish to dedicate their IP rights to the public domain to do with the added benefit of defensive protection against those who may attempt to enforce related IP in the future.
