

While North Carolina ranks very high in the US for the number of women in tech jobs, there is great opportunity to increase the number of women in those positions, including leadership roles. Join NC TECH in Wilmington for a one-day+ summit featuring candid conversations with women tech leaders where we explore gender bias, share our unique journeys, discuss how to shift the paradigm, and provide insights on how to advocate for change both now and for the next generation. This women-only destination event will also feature options for social + tourism activities, a welcome reception on the waterfront and small group dinners around town.
