What the transition to next gen connectivity means for consumers + organizations

DEMYSTIFYING 5G

Learn More

The next generation of mobile connectivity is expected to launch around the world by 2020. Why all the hype? Experts say the improvement in speed and capacity will be exponential, with significant impact on both consumers and organizations. Join NC TECH for a special session of our "Thought Leaders Series" where experts from leading organizations and companies will explain and discuss what the 5G rollout will mean.

FORMAT

➢ **Opening Briefing:** A recognized SME on what 5G is and setting the context for a panel discussion
➢ **Panel #1** to consist of four SMEs from NC TECH member companies (providers of equipment, devices, services, and the like).
➢ **Panel #2** to consist of leaders from various sectors that will be impacted (public safety, rural NC, etc.)
