NC STATE WORKING TO MEET GROWING STEM NEEDS

Information Technology job openings remain at high levels across the state and are growing year over year. This trend is expected to continue, especially with major announcements like Apple, Google, and most recently MetLife hiring hundreds of professionals to work in NC. Where will companies source talent? One key resource leads the pack – the Wolfpack. NC State’s College of Engineering consistently earns accolades for its programs, including a #1 ranking for the Master of Computer Science program.

Engineering North Carolina’s Future, a state legislative initiative, will allow NCSU to enroll more than 4,000 additional students in engineering and computer science programs. This $50 Million expansion will hire faculty and staff and upgrade facilities to help meet the needs of companies in North Carolina.

Did You Know?

- NC State currently educates one-third of all STEM students in the UNC System
- More than half of NC State students are enrolled in STEM majors
- In 2020, NC State awarded about 5,500 STEM degrees, an increase of 42% over 10 years

RESEARCH UNDERWRITERS

With the support of underwriters, NC TECH commissions + releases research on the state’s tech sector for the benefit of our members, and as a resource for policy makers, economic development leaders, and the media. Thank you to the 2022 Research Underwriters. For more information about becoming a Research Underwriter, visit nctech.org/research and select the Underwriter’s Menu button.
